OKLAHOMA CITY

Chesapeake Energy Corporation today announced that its Board of Directors has declared a \$0.03 per share quarterly dividend that will be paid on October 15, 2002 to common shareholders of record on October 1, 2002. Chesapeake has approximately 166,000,000 common shares outstanding. The expected annual cost of the common stock dividend will be about \$20 million.

In addition, Chesapeake's Board has declared a regular quarterly cash dividend on Chesapeake's 6.75% Cumulative Convertible Preferred Stock, par value \$.01. The dividend for the preferred stock is payable on November 15, 2002 to preferred shareholders of record on November 1, 2002 at the quarterly rate of \$0.84375 per share. Chesapeake has 2,998,000 shares of preferred stock outstanding with a liquidation value of \$150 million. The annual cost of Chesapeake's preferred stock dividend is about \$10 million.

The company also announced that it intends to sell or trade its Permian Basin assets so that it can further tighten its focus on the Mid-Continent region, where 85% of its assets are presently located. The company will favor proposals that involve a trade of Mid-Continent assets for Permian assets. In the Permian, Chesapeake produces approximately 18 million cubic feet of gas equivalent per day (60% gas). By comparison, in the Mid-Continent the company is the region's largest producer with proved reserves exceeding 1,800 bcfe and daily production exceeding 450 million cubic feet of gas equivalent. Chesapeake has hired Petrie Parkman & Co. to assist it with the Permian asset sale or trade process.

Management Comment

Aubrey K. McClendon, Chesapeake's Chairman and Chief Executive Officer, commented, "We believe today's announcements are beneficial to our shareholders for several reasons. First, our planned exit from the Permian reflects the reality that while Chesapeake is the largest gas producer in the Mid-Continent, we are a minor player in the Permian. We see many other companies in the reverse position and expect to execute a trade or series of trades that can be mutually beneficial for the companies involved. As a result of higher gas prices, lower operating costs, more accessible land and better drilling results, our returns on investment have been greater in the Mid-

Continent than in the Permian. Chesapeake's unmatched regional scale has been an important key to delivering top-tier financial returns to our shareholders during the past four years. We intend to continue this strategy in the years ahead.

"Secondly, the initiation of a common stock dividend reflects our confidence in Chesapeake's financial strength and the positive fundamentals we see for gas prices in the years ahead. In addition to the capital gains that we expect Chesapeake to generate for shareholders in the future, the common stock dividend should deliver further value to our shareholders. At today's stock price, the annualized dividend yield would be 1.9%, very competitive with the S&P 500's current dividend yield of 1.7%. The annual cost of this program is a modest \$20 million per year and should not impact our ability to continue growing our company's assets at 5-15% per year, reducing relative or absolute debt levels and delivering one of the industry's leading total returns to shareholders."

Chesapeake Energy Corporation is one of the largest independent natural gas producers in the U.S. Headquartered in Oklahoma City, the company's operations are focused on developmental drilling and property acquisitions in the Mid-Continent region of the United States.
